

Arkansas Wills & Trusts

June 2019

(v.19.01)

Legal Developments

Increased Federal Tax Exemptions (effective January 1, 2019)

Applicable Exclusion Amount: \$11,400,000 (up from \$11,180,000)
GST Exemption Amount: \$11,400,000 (up from \$11,180,000)
Gift Tax Annual Exclusion Amount: \$15,000 (no change from 2018)

The former references to these amounts in the Law & Strategy and Synopsis (they do not appear in the documents) were necessarily generic, having been programmed before the exact IRS numbers were released. We have made them more precise for this year.

SOFTWARE UPGRADES

Scratch Pad Upgrade

Some users had commented that the Scratch Pad would be more useful if the same data could be stored in more than one place. This allows bunching of information, such as trustees' names, even if the same information is desired in a different spot in the Scratch Pad. We did not previously allow duplicate entries in that tool because of programming considerations, but that has been modified and the Scratch Pad can now contain duplicate data. We are working on other enhancements to make this tool even more valuable!

Microsoft Word Users

For Word users, we added a function to immediately convert the exported document to native Word format based on Word 2007 or later (versions earlier than Word 2007 are not supported), so your document will be in the .docx format when it opens.

Explanation: To be as flexible as possible for various word processors, Lawgic exports documents in Rich Text Format (RTF) that both Microsoft Word and Corel WordPerfect can easily read. RTF in its native form is not as robust or sophisticated as either of those word processing programs and, if the edited document is saved with an RTF extension, some glitches can occur. Some document management systems have trouble handling the conflict between formats. This new procedure should solve those issues.

WordPerfect users don't seem to have these problems, but we will keep an eye out for inconsistencies going forward.
